		Application I	No.	Applicant(s)				
Office Action Summary		10/660,588		OZIN ET AL.				
		Examiner		Art Unit				
		William P. Fle	tcher III	1762				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).								
Status								
1)⊠	1) Responsive to communication(s) filed on <u>12 September 2003</u> .							
2a) <u></u> □	This action is FINAL . 2b)⊠ This action is non-final.							
3)	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is							
	closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.							
Disposition of Claims								
4)⊠	Claim(s) <u>17-86 and 101</u> is/are pending in the a	application.						
4	4a) Of the above claim(s) is/are withdrawn from consideration.							
5) Claim(s) is/are allowed.								
	Claim(s) is/are rejected.							
	Claim(s) is/are objected to.							
8) 🔀	Claim(s) <u>17-86 and 101</u> are subject to restriction	on and/or elec	ion requirement.					
Application	on Papers							
9) 🔲 🗆	The specification is objected to by the Examine	er.						
10) 🔲 🗆	Γhe drawing(s) filed on is/are: a)□ acc∈	epted or b)	objected to by the E	xaminer.				
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).								
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).								
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.								
Priority u	nder 35 U.S.C. § 119							
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of:								
	1. Certified copies of the priority documents have been received.							
2. Certified copies of the priority documents have been received in Application No								
3. Copies of the certified copies of the priority documents have been received in this National Stage								
application from the International Bureau (PCT Rule 17.2(a)).								
* See the attached detailed Office action for a list of the certified copies not received.								
Attachment	(s)							
1) Notice of References Cited (PTO-892) 2) Notice of Draftsperson's Patent Drawing Review (PTO-948) 4) Interview Summary (PTO-413) Paper No(s)/Mail Date								
3) Inform	e of Draftsperson's Patent Drawing Review (PTO-948) nation Disclosure Statement(s) (PTO-1449 or PTO/SB/08) No(s)/Mail Date			ite atent Application (PT0	O-152)			

Art Unit: 1762

DETAILED ACTION

1. This action concerns claims 17-86 and 101, as amended September 12, 2003.

Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 17-29, drawn to a method of synthesizing composite material comprised of a highly ordered colloidal crystal and a substrate, classified in class 427, subclass 282.
 - II. Claims 30-41, drawn to a method of synthesizing composite material of a colloidal crystal and a substrate, classified in class 427, subclass 240.
 - III. Claims 42-51, drawn to a method of synthesizing composite material comprised of a colloidal crystal and a substrate, classified in class 427, subclass 282, 255.27, or 372.2.
 - IV. Claims 52-74, drawn to a method of synthesizing composite material of a colloidal crystal and a substrate and a method for producing a film of colloidal particles on a planar surface of a substrate, classified in class 427, subclass 430.1.
 - V. Claims 75-86, drawn to a method of synthesizing composite material comprised of a colloidal crystal and a substrate, classified in class 427, subclass 261.
 - VI. Claim 101, drawn to a method of producing a Lincoln Log Wood Pile superlattice, classified in class 427, subclass 256+ or 202.

The inventions are distinct, each from the other because of the following reasons:

Application/Control Number: 10/660,588

Art Unit: 1762

3.

Inventions I-VI are unrelated. Inventions are unrelated if it can be shown that they

are not disclosed as capable of use together and they have different designs, modes of

operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different

inventions are not disclosed as capable of use together and have designs, modes of

operation, and effects that are distinct from one-another.

A. For example, inventions I, III, and V utilize capillary forces to draw the

colloidal crystal material under the mask, while invention II utilizes spinning to distribute

the material across the substrate, invention IV utilizes immersion and the formation of

Langmuir-Blodgett films of the material, and invention VI utilizes self-assembly of the

material on a pre-applied polymeric layer.

B. Further, among inventions I, III, and V: invention I utilizes a patterned

substrate and a planar mask, with formation of the crystal material in the voids of the

substrate, while invention III utilizes a planar substrate and a patterned mask, with

formation of the crystal material in the voids of the mask; invention V, while it is similar to

invention III in that it utilizes a planar substrate and a patterned mask, results in the

crystal material being distributed in a cured polymer matrix.

4. Because these inventions are independent or distinct for the reasons given above

and have acquired a separate status in the art in view of their different classification,

restriction for examination purposes as indicated is proper.

5. Because these inventions are independent or distinct for the reasons given above

and the inventions require a different field of search (see MPEP § 808.02), restriction for

examination purposes as indicated is proper.

Page 3

6. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Fletcher III whose telephone number is (571) 272-1419. The examiner can normally be reached on Monday through Friday, 0900h-1700h.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy H. Meeks can be reached on (571) 272-1423. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
